

## Environmental policy

The object of Czech Airlines Technics, a. s. in all its activities, processes and services related to aircraft Line and Base maintenance, aircraft component maintenance, operators support, landing gear maintenance and providing of selected services by airplane handling process on Prague Ruzyně Airport is to minimize the negative effect on the environment and on our employees' health.

The CSAT Management and all CSAT employees are aware of responsibility for environment protection and thus we will struggle to keep following principles:

- Adhere to all legal regulations in environmental field and make an effort to comply with demands of involved partners.
- Apply appropriate technologies and procedures to avoid or constantly reduce contamination of environment.
- Reduce amount of dangerous chemicals used and eventually replace them by more environmental friendly substances.
- Cooperate on suppression of our all activities effect on environment with our suppliers, authorities of public administration and other partners.
- Continually educate all of our employees to continuously improve their awareness and necessary knowledge in the relevant environmental aspects.
- Maintain, develop and continuously improve established system of CSAT environmental management.
